

PRESS RELEASE

For Immediate Release

Camvio Announces Partnership with ONLINE Information Services, Inc.

Partnership will deliver cutting-edge risk assessment tool for bad-debt prevention to Camvio clients

Winterville, NC - ONLINE Information Services, Inc. and Camvio are pleased to announce a partnership, which will include the integration of ONLINE's premier risk assessment and bad-debt elimination tool, the ONLINE Utility Exchange, with Camvio's industry leading billing software.

Through its partnership with ONLINE, Camvio will offer an integrated, real-time credit risk assessment, and Red Flag compliance tool to their clients. The ONLINE Utility Exchange will utilize application data entered in Camvio's billing system to verify the applicant's identity, return an accurate deposit decision according to the utility's policies, and highlight unpaid utility bills and disconnects from ONLINE's unique national Utility Exchange database and other national sources. Further, the integration will allow Camvio users to send their customer payment information and delinquent accounts to ONLINE automatically, helping to track customers who do not pay their bills from utility to utility through ONLINE's national Utility Exchange database.

About the ONLINE Utility Exchange:

Established in 1956 as a credit bureau and collections agency, ONLINE Information Services, Inc. is currently the nation's leading developer of risk management and debt recovery solutions for the Utility, Property Management, Healthcare, and Mortgage industries. Serving over 1,100 utilities throughout the nation, the ONLINE Utility Exchange is a utility-specific credit bureau with the single focus of providing the tools necessary to assess risk, and eliminate bad debt. About Camvio:

Emerging out of the software and communication industries, Camvio has made a bold statement of the need for simplicity when it comes to operational efficiencies. We believe billing systems should not be complex, expensive and painful to implement. Our ultimate goal is to deliver a software platform so easy to use, that there is very little training needed for implementation. Your billing solution should deliver features and functions you didn't know you needed or wanted. Being ten steps ahead of the curve is where we want to be, and intend to stay. For more information, visit our website www.camv.io.
